Company Phoenix Sky Harbor International Airport

- Arizona's largest and busiest airport
- Handles more than 1,250 aircraft, 800 tons of cargo and 100,000 passengers daily

Industry

Transportation

Challenges

- Needed a service company partner to supply and maintain new life safety systems
- Needed accurate, consistent inspection reporting and streamlined compliance documentation

Solution

- BuildingReports' web-based reporting technology
- Services provided by BuildingReports' member network

Results

- Improved and streamlined inspection reporting
- Provided detailed inspection reports in compliance with regulatory standards

Company Profile

Sky Harbor International Airport in Phoenix is the largest airport in Arizona. In 1935, the airport started out with one runway in a rural area and was known by residents as "The Farm." Today, Sky Harbor is one of the busiest airports in the United States, and a significant economic engine for both the Phoenix community and the state. One of the ten busiest airports in the United States, Sky Harbor airport served more than 40 million passengers in 2013 with a daily economic impact of \$79 million. Every day, the airport sees some 1,250 arriving and departing aircraft, more than 100,000 passengers, and handles more than 800 tons of cargo.

Challenge

Sky Harbor's safety team needed to partner with a fire and life safety service company that could not only provide quality fire and life safety systems, but would also offer top-notch inspection services. Additionally, the Sky Harbor team required detailed inspection reports that would be documented in compliance with regulatory standards to satisfy the reviewing aviation authorities and Occupational Safety and Health Administration (OSHA) officials. The safety team also needed to coordinate systems and inspections throughout the main airport and the new control tower in order to ensure accurate and consistent inspection reporting.

"Not having to deal with paper is one of the biggest benefits of using BuildingReports. Having the report information accessible on my computer at any time allows me to answer questions about maintenance or discrepancies immediately."

Craig Kent, User Technology Specialist
Sky Harbor International Airport

Sky Harbor International Airport

"It's a lot easier to scan a barcode and get information, than to have to write everything down on paper."

Craig Kent,User Technology Specialist

"The AHJs and OSHA officials were amazed at the level of detailed information in our inspection reports. They were very pleased — and that's a major benefit for us."

Dana Rogers, Coordinator, Technical Operations
Sky Harbor International Airport

Solution

After extensive research, Sky Harbor's safety team chose BuildingReports' web-based inspection reporting system, along with services provided by a member of BuildingReports' worldwide service member network. The Sky Harbor safety team gave BuildingReports' inspection solutions high marks. BuildingReports' ScanSeries reporting applications helped streamline Sky Harbor's inspection reporting, solving a significant challenge. The accurate and comprehensive inspection reports – including device–specific information – give the safety team at Sky Harbor more detailed information than ever before. And BuildingReports' third-party verification and certification ensure verifiable inspection results, satisfying the reviewing aviation authorities and OSHA officials.

Results

Today, BuildingReports' innovative inspection reporting service provides comprehensive data and statistical analysis on every device inspected, enabling Sky Harbor's safety team to streamline their inspection process and improve their compliance reporting.

About BuildingReports

Since introducing the first web-based inspection reporting system in 1999, BuildingReports has been committed to providing the most trusted compliance reporting solutions. Today it operates the world's largest network of independent service organizations and facility managers completing inspections in hundreds of thousands of buildings worldwide. BuildingReports' digital inspection and compliance reporting ensures accurate and comprehensive inspections that are fully documented in compliance with regulatory standards. Third-Party Verification and certification ensures verifiable inspection results. Users can access data online with standard Internet browsers from any location for flexible property management.
