

National Accounts

With the nation's largest network of Service Members, BuildingReports has launched a National Accounts program designed to deliver new recurring revenue opportunities for ITM service providers participating in the network on a local, regional, or national basis.

Large-scale operations with geographically diverse facilities and management teams present unique challenges when it comes to ensuring compliance and maintaining critical assets. The BuildingReports National Accounts Program allows organizations to consolidate all fire and life safety compliance reporting and preventative maintenance documentation in a single, secure web-based portal available to all stakeholders as needed, regardless of physical location. This unique value proposition allows BuildingReports to bring more opportunities to our network for Service Members like you.

THE LARGEST NETWORK OF QUALIFIED SERVICE PROVIDERS

BuildingReports' network provides expert service, inspection, and asset reporting for:

- Fire Alarm & Signaling
- Fire Sprinkler
- Fire Suppression
- HVAC & Refrigeration
- Life Safety
- Security

The use of BuildingReports has streamlined compliance reporting across multiple sites.

— Manager of Fire Detection & Suppression for Facilities & Corporate Engineering-Regulatory Compliance, Large Healthcare Network

With BuildingReports' National Accounts Program, facility management professionals can rely on BuildingReports' expert team of industry professionals like you to manage their fire protection and critical assets to free up valuable resources for other important initiatives. This includes BuildingReports TrueCompliance® Verified Service Members that have been independently reviewed and confirmed to be licensed, certified and insured. BuildingReports matches the expert service providers best suited to meet the needs of a particular occupancy type, building system, or compliance requirement.

The most trusted name in compliance reporting

The BuildingReports Advantage

Now you can maximize efficiency, save money and reduce risk by managing critical inspection data with BuildingReports' detailed online reports. BuildingReports puts information at your fingertips. Just login to your secure account and review your report, authorize repairs, manage inventory and view inspections. Your information is accessible whenever and wherever you need it and immediately available to print for binder insertion when required. For more information about BuildingReports web-based fire and life safety inspection-reporting solutions, call +1 770 495 1993, email info@buildingreports.com or visit our website at www.buildingreports.com.

THE MOST TRUSTED NAME IN COMPLIANCE REPORTING

BuildingReports' Service Member network leverages the industry-leading suite of inspection and preventative maintenance mobile applications for iOS and Android to capture important information on each asset in a facility. This includes critical information such as manufacturer and model number for recall tracking, installation date for warranty tracking, services performed, and much more depending on the code or device specifications. These valuable incentives help attract some of the most lucrative nationwide contracts which BuildingReports can pass along to our Service Members.

POWERFUL ENHANCEMENTS ONLY AVAILABLE FROM BUILDINGREPORTS SERVICE MEMBERS

In addition to the powerful core functionality provided via ScanSeries, Service Members can offer a host of other value-added features available via the same convenient National Account portal, such as:

- **DocDrive®** and **DocDrive Plus™** allow technicians to include images of devices and attach them to the device record in the report. Both include the interactive floorplan feature that allows for the uploading of building floor plan images so that inspectors can use drag-and drop icons to map the physical location of a device being inspected or serviced.
- **Embedded Codes & Standards®** provides verbatim code references for failed devices to help explain why the device did not meet the codes and standards. References to codes and standards from NFPA, OSHA, NIOSH, and even CMS accredited agencies such as The Joint Commission to meet stringent healthcare industry requirements.
- With **SchedulingManager**, facility management and service companies can coordinate service and inspection schedules, see which systems and companies are involved, and see what service calls are scheduled for which facilities now, or in the future.

- **NotificationManager** allows for monitoring of company inspection activity with automatic email and SMS notifications. Key stakeholders can be notified when new inspection reports are available, alerts can be created for staff when discrepancies are reported, and communications can be established for various types of work activities.
- **ServiceManager** enables facility management and service companies to communicate and confirm service appointments automatically via email, create and approve service tickets, track service pricing and tech hours and manage service events in the field as needed.
- **LiveArchive®** and **ScanHistory™** provide on-demand access to historical reporting logs and device history with the simple scan of a QR or bar code. Onsite facility management teams with authorized access can immediately pull up the complete facility's reporting history using the QR code sticker applied to the building's fire panel, or wherever it's most convenient to provide access. And with ScanHistory, each device's complete details and service history can be accessed simply by scanning the same barcode the technicians use to perform the inspection or service.

INTELLIGENT INSIGHTS. ECONOMICAL EFFICIENCY. CONVENIENT COMMAND.

With the National Account program, BuildingReports delivers new customers to you without the sales or back-office time and expense. Critical asset information is accessible whenever and wherever it's needed to maximize efficiency, save money, and reduce risk and liability for some of the largest organizations in the country.

TESTIMONIALS

"All the reports were automated and available online, so I could see what was going on without having to dig through handwritten reports, which are not easy to read. We're in a better spot because of maintenance. I can pinpoint what's wrong. We're in a better spot because I can project which systems need to be changed, and if I need to get a quick device count because I have something I need to get changed immediately. I don't have to go to the school and pull a program or walk the building."

— David Resmondo, Senior Security Specialist, Atlanta Public Schools

"Not only can I access it online remotely anytime, even on the weekends, but I can quickly get the information I need and get a deeper dive than would ever be possible with paper. When you manage as many facilities as we have, we need quick access to information and inspection results."

— Jeff Romine, Shaw Industries

BuildingReports' inspection technology provided easy to read inspection reports, which helped us track and service device deficiencies in order to maintain our life safety systems in good working order. ”

—George Galdo, Network Coordinator
Verizon Wireless
